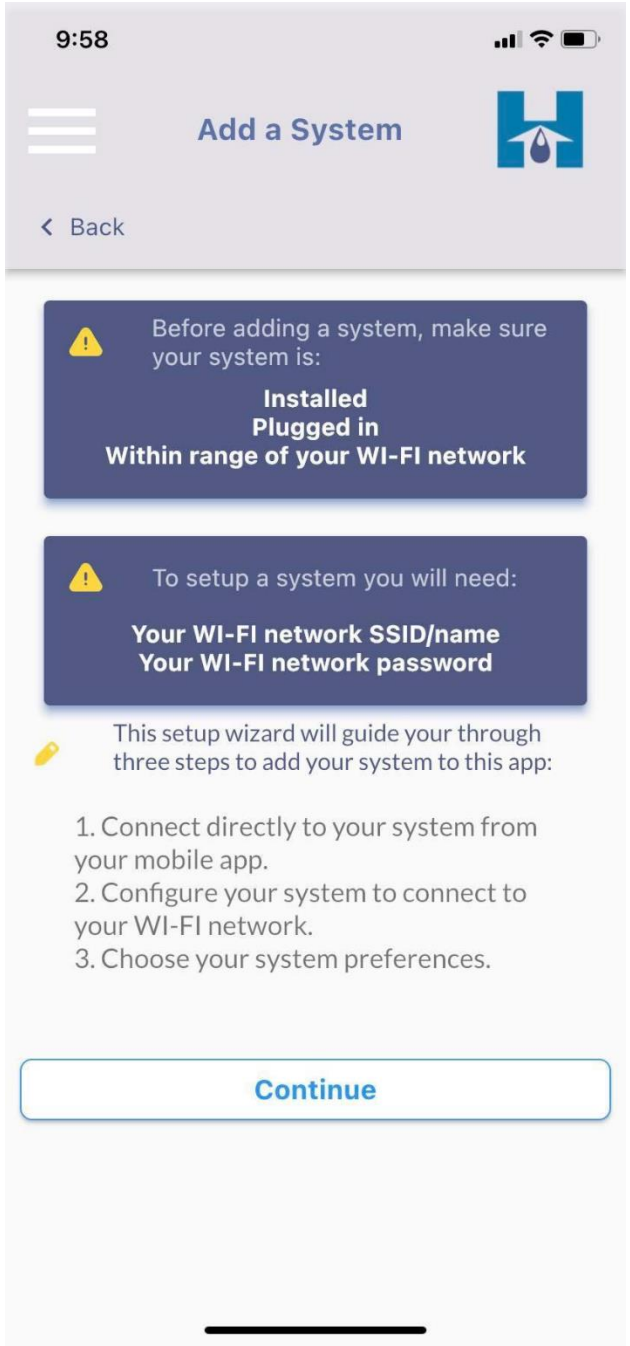
Welcome
You can monitor or configure your HCS Humidex series system by syncing it with this mobile app.
Setting up a new system will take approximately five to ten minutes.
+ Add a system



9:58
Add a System
Back
Before adding a system, make sure your system is:
Installed
Plugged in
Within range of your WI-FI network
To setup a system you will need:
Your WI-FI network SSID/name
Your WI-FI network password
This setup wizard will guide your through three steps to add your system to this app:
1. Connect directly to your system from your mobile app.
2. Configure your system to connect to your WI-FI network.
3. Choose your system preferences.

STEP 1 OF 3
Connect to the System
This system has it's own built in WI-FI 'hot spot' wich broadcasts a signal, just like the WI-FI network you connect to with access to the internet.
The first thing we need to do is connect to our system using your mobile phone. To do that, you need to find your system like you would a WI-FI hot spot in a coffee shop. The name of the connection will be similar to:
eg. HCS-XXXXXXXXX-XXXXX
Connect to your system and return to this app.
Open WI-FI settings

STEP 3 OF 3
Choose Your System Settings
Almost done!There are three more pieces of information we need to finish adding your system to the app:
Name of your unit
Unit location
Humidity Preference
Let's start by giving your unit a name. If you have more than one unit,you'll want to make sure this name is unique so you don't confuse them.
